

Live Video Monitoring Services

▶ BUSINESS OPERATIONS REVIEW SERVICES (BORS)

iLink provides in depth investigative services arising out of Business Operations Review Services (BORS). iLink's Business Operation Investigative Services provide businesses with in-depth investigation and research for problem areas such as false liability claims, workmen comp claims, and employee theft. With the help of investigative services, iLink can help identify certain patterns or problem areas that decay business operation and profitability. Additionally this service can be used to help define marketing goals and objectives in areas such as customer demographics, buying patterns and Point-of-Purchase display effectiveness.

These services can be used to:

- ▶ Analyze POS transactions
- ▶ Provide evidence in false liability claims
- ▶ Review workman's comp claims
- ▶ Examine customer buying practices

▶ INTERACTIVE REMOVE VIDEO MONITORING (IRVM)

iLink's Interactive Remote Video Monitoring is a combination of multiple solutions that improve both safety and security as well as provide businesses with operational efficiency tools to manage their businesses more effectively. Prescheduled activities and/or on demand intervention enables proactive and intelligent responses to requests for help, intrusion alerts or important business transactions. These tasks are accomplished through iLink's expert staff with latest in video and two-way audio technologies. Some of these services can be provided as an on demand or prescheduled basis.

IVRM - POPULAR APPLICATIONS

- ▶ Visual Verification service for false alarms.
- ▶ Emergency Response for medical or life safety situations
- ▶ Vendor Deliveries supervision
- ▶ Remote Guard through video and 2 or 1 way audio forewarns thieves, loiterers and potential criminals that their activities are being monitored
- ▶ Virtual Escort service helps provide safety while entering and exiting a building or chaperoning employees to outside parking lots.

▶ LIVE VIDEO MONITORING SERVICE (LVMS)

iLink's live video monitoring is the ultimate service for maximizing loss prevention, business operations, compliance, security and safety of the businesses. Instant responses can be achieved that provide high impact results. There is always a professional expert viewing your facility ready to respond to anything that is not in conformity with the agreed upon rules and policy set up for this service. You get a virtual security guard, a certified business specialist who understands your business and an emergency response team ready to take upon any challenges. Live Video Monitoring Services can be obtained on a 24/7, certain shifts or OFF/ON hours basis. Our customers get detailed reports of agreed upon activities supported by video clip/images.
